

Ariel™

Ariel Regional Regulatory Coverage — Middle-East/Africa

Ariel Regional Regulatory Coverage is a powerful, comprehensive collection of regulatory content enabling manufacturers and distributors to save money, improve their level of compliance, reduce risk and protect their corporate brand.

OVERVIEW

3E's Ariel Middle-East/Africa Module provides convenient, targeted coverage of the region's most important product clearance and environmental, health and safety (EH&S) regulations. 3E works closely with regulatory agencies to ensure the most accurate data is available.

DATABASE COVERAGE

The Ariel Middle-East/Africa Module focuses regulatory issues related to:

- Occupational Exposure Limits
- Classification and Labeling of Dangerous Substances
- Hazardous Substances Regulations
- Permissible Limits of Air Pollutants in Emissions

The database contains such information for chemicals regulated in the following countries:

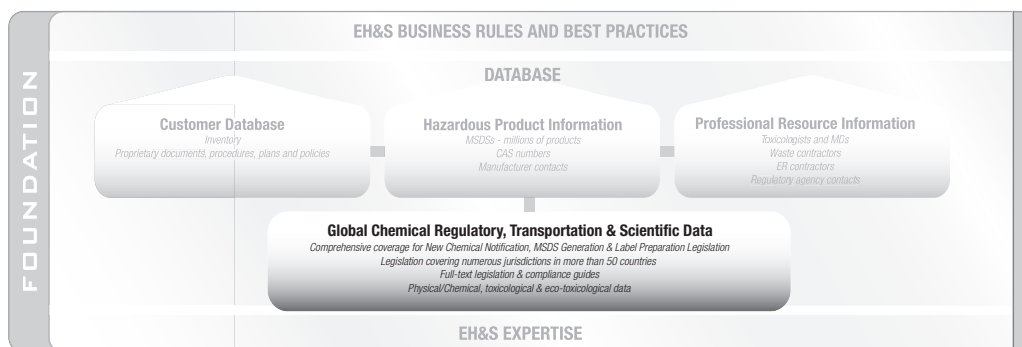

- Egypt
- Israel
- South Africa
- Turkey

ARIEL FOUNDATION

The foundational core of Ariel products is the massive aggregation of global regulatory content that is delivered or accessed by the products and services within the Ariel EH&S Decision Support family. These products provide up-to-date, comprehensive global regulatory information containing thousands of searchable chemical lists, full-text regulations and compliance guides covering more than 50 countries. Access to this collection of global regulatory content provides unprecedented support for identifying, monitoring and complying with complex

and ever changing EH&S requirements. 3E's Ariel Global Research Team consists of international, multi-lingual experienced product stewards, industrial hygienists, attorneys, chemists, chemical engineers, MSDS experts and EH&S systems consultants, all of whom are dedicated to providing the most up-to-date information available.

EH&S CHALLENGES

Managing the information associated with environmental, health and safety compliance is a complex, time consuming, resource intensive and often expensive task. Manufacturers and distributors are especially challenged because they have complex internal and external obligations. Internally, they must ensure the safety of their own employees. Externally,

they must ensure the safety of their products, provide information to their downstream customers, and comply with government regulations related to import/export, hazard communications, new chemical notification, reporting and the restriction on marketing and use of hazardous substances.

EH&S SOLUTIONS

At 3E Company, we understand the business and the burden of EH&S information and compliance management. We have combined an experienced and dedicated staff of EH&S professionals with the power of a rich database of global regulatory information, chemical lists, and millions of MSDSs. The result is a set of EH&S business rules and best

practices that are unparalleled in the industry. 3E delivers all its services via leading edge, reliable technology and through 3E's HazMat Mission Control Center, which is accessible 24-7-365. 3E's services have proven to deliver cost savings, improve process efficiencies, reduce risk and liability and provide a competitive advantage.
