

## Chemical Data Reporting Services

*Get the specialized expertise and support you need from our team of trusted experts*

### **Overview**

In line with the Environmental Protection Agency's (EPA) recently issued final CDR Rule, which was previously known as the Inventory Update Reporting (IUR) Modifications Rule, 3E provides Chemical Data Reporting (CDR) Services. Access to reliable support is instrumental to navigating the new rule and its many complexities, including those related to the EPA's intent to reduce the number Confidential Business Information (CBI) claims.

### **Support you need, when you need it**

3E's team of professionals can perform the following:

- CDR regulatory support (inventory update report) - review of the September 6, 2011 Final Rule CDR requirements and notification of relevant changes in definitions, scope, thresholds, schedule, and exemptions
- Definition of rules and processes - review of current mechanisms for tracking volumes and other information required for imported and manufactured products and materials at the substance level, as well as definition of reporting processes
- Inventory searches - review of inventory and determination of which chemicals are affected and which are exempt
- Data compilation - identification of required chemical information, including identity, site, volume, use categorization, production, marketing, and industry codes
- Data confirmation - review of inventory and determination of whether any required information needs tracking, along with requisite recommendations
- On-site support - orientation, training, collaboration, and review of reports
- CDX registrations - support registrant registrations and provide requisite guidance
- Complete reports - eCDRweb - complete Form U
- Documentation and filing - collate and compile supporting documentation for regulated materials, and provide submission support for hard copy records

### **About the new rule**

- Reporting frequency has reverted from five years to four years
- Information about 2011 manufacturing, processing, and use and information about 2010 production volume must be reported
- Five-month submission period (February 1 to June 30, 2012)

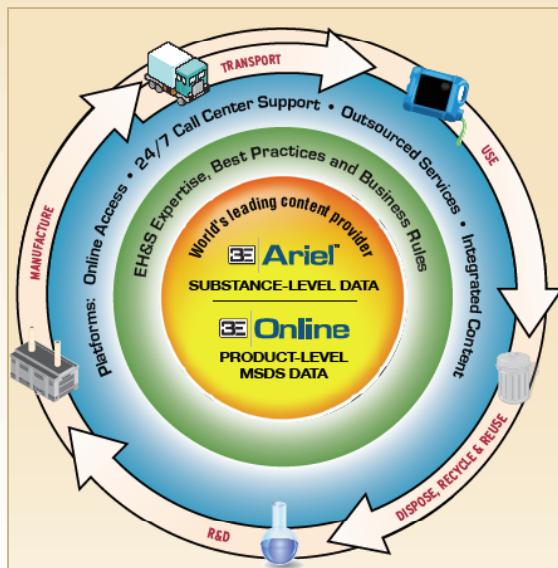

### **Manufacturer and Importer Requirements**

- Report if the production volume of a chemical substance meets or exceeds the 25,000-pound threshold during the principal reporting year (i.e., calendar year 2011)
- Provide upfront substantiation for each processing and use data element claimed as CBI. Submitters cannot claim those data elements as confidential when they are identified as "not known to or reasonably ascertainable by"
- Use e-CDRweb, the EPA's electronic reporting tool, to submit all CDR information through the Internet

### **Full Chemical Lifecycle Management**

3E Company's comprehensive suite of data products and information services enables improved compliance with global Environmental Health & Safety (EH&S) requirements related to the safe manufacturing, distribution, transportation, usage and disposal of chemicals and hazardous products. Whether you are a manufacturer, distributor, transporter, retailer or corporate user of chemicals or hazardous products, 3E can deliver a program specific to the EH&S compliance information and management needs of your organization that provides benefits to the entire enterprise and throughout the supply chain. 3E Company's full product lifecycle and supply chain approach provides a single, integrated solution for managing EH&S capabilities, resulting in reduced cost, risk and liability while improving business and compliance processes.

### **EH&S Challenges**

With the spotlight shining brightly on EH&S compliance, companies are challenged with finding effective ways to address the complexities and intricacies of EH&S compliance management. Not only do these challenges stem from a constantly-changing regulatory landscape, but also from a scarcity of newcomers to the EH&S field, and pressure on EH&S departments to manage increased responsibility with fewer resources. Addressing these issues requires broad and deep domain expertise—expertise that doesn't always exist within the company. And if it does, this expertise is probably best utilized driving the company's overall compliance strategy, not bogged down with paperwork or the administrative burdens associated with maintaining compliance.

### **EH&S Solutions**

At 3E Company, we understand the business and the burden of EH&S information and compliance management. 3E Company is a comprehensive, one-stop solution for content, tools and services for companies that want to take effective leadership and control of their product stewardship and EH&S compliance activities. 3E's products and services help companies make the transition from simply managing for compliance, to cutting-edge product stewardship practices that deliver tangible and sustainable business results.
