

INFORMATION ABOUT SUPPLY CHAIN RISK AND COMPLIANCE

Moving things from one place to another. Getting raw material and manufactured products from the source to the customer. Keeping the wheels of commerce turning. The supply chain presents many risks for manufacturers, retailers, transportation companies, and others. Verisk Analytics provides a variety of information, systems, and services to help you manage supply chain risk and compliance.

3E Company

Chemical, regulatory, and compliance services

3E Company is a global provider of services that help you comply with government-mandated environmental health and safety (EH&S) requirements for hazardous chemicals and other products. The services meet the information and management needs of organizations throughout the supply chain and the product life cycle.

AIR Worldwide

Catastrophe modeling

AIR Worldwide is the scientific leader and most respected provider of catastrophe risk modeling software and consulting services. AIR founded the catastrophe modeling industry in 1987 and today models the risk from natural catastrophes and terrorism in more than 90 countries.

Organizations across the supply chain rely on AIR software and services for catastrophe risk management, detailed site-specific wind and seismic engineering analyses, agricultural risk management, and property replacement-cost valuation.

Atmospheric and
Environmental Research

Atmospheric and Environmental Research (AER) Services for weather and climate-related risk

Atmospheric and Environmental Research (AER) is a leading source of research and services that further understanding of the global environment and help you make better decisions in response to weather and climate-related risk. According to the U.S. Department of Commerce, weather directly or indirectly affects 30 percent of the gross domestic product. The effects on retail businesses and the supply chain are particularly significant. AER's science applications have fundamentally influenced the way businesses, researchers, and national governments interpret the earth around us.

CargoNet®

The cargo theft prevention and recovery network

CargoNet® is a national database and information-sharing system managed by crime analysts and subject-matter experts. The system is designed to prevent cargo theft and increase recovery rates through secure and controlled information sharing among theft victims, their business partners, law enforcement, and the National Insurance Crime Bureau (NICB). CargoNet includes integrated databases, a theft alert system, 24-hour support for law enforcement investigations, a tractor/trailer theft deterrence program, a truck-stop neighborhood watch program, and a variety of other programs.

Enabl-u Technologies

Data management, analytics, and training services

Enabl-u Technologies is a leader in loss prevention services for retail, hospitality, grocery, banking, healthcare, and other businesses, as well as law enforcement and government. The company offers data management, analytics, and training services used in the loss prevention operations of many Fortune 500 companies and most major retailers in the United States.

Engineering and Safety Service (E&S™)

Information for risk management and loss control

The Engineering and Safety Service (E&S™) is a leading provider of technical, legislative, and regulatory information for risk management and loss control. Insurance companies, agents, and customers throughout the supply chain use E&S information for the purposes of managing commercial property/casualty risk and promoting the safety and welfare of the public. E&S supplies a variety of products — such as technical reports, training programs, conferences, and legislative and regulatory information — and offers a unique consultation service.

Insurance Information Exchange (iiX)

Motor vehicle reports, undisclosed-driver reports, credit score reports, and more

Insurance Information Exchange (iiX) offers driver screening information for employers of all sizes. iiX delivers motor vehicle reports, undisclosed-driver information with vehicle identification numbers (VINs), credit scoring, and claims histories. The information helps you evaluate risk, reduce liability, and lower insurance premiums. And iiX fleet risk management services help promote safety and keep track of drivers.

IntelliCorp

Background checks and employment screening

IntelliCorp provides secure and instant online access to criminal records and other public information. The services help you reduce exposure to fraud, workplace violence, and negligent-hiring lawsuits. FCRA-compliant, IntelliCorp delivers the most comprehensive, accurate, and reliable information to help you make the best possible hiring and personnel decisions.

ISO Survey Services

High-quality information from the masters of observation

For more than 30 years, ISO has been a leading supplier of statistical, actuarial, underwriting, and claims data for the property/casualty insurance industry. Now, ISO's risk information is available to companies in all industries. ISO offers risk assessment surveys that provide high-quality, up-to-date information on conditions and hazards at any property in the United States. ISO surveys give you objective information on commercial properties and their potential exposure to loss, helping to minimize the risk of potential catastrophic business disruption throughout your supply chain.

SPI Plus®

Information about specific commercial properties

ISO's Specific Property Information (SPI Plus®) is the online ordering system that provides web access to a variety of reports on millions of commercial buildings around the country. Having accurate information on the characteristics of specific buildings involved in your supply chain is critical to reducing risk and making sound decisions. To assemble the information, ISO maintains a 550-person staff trained to gather information on individual properties and communities. The result is a comprehensive source of data for about 3 million commercial buildings and more than 5.4 million individual businesses occupying those buildings.

LOCATION®

Property and risk information representing every address in the United States

LOCATION® is Verisk's unique risk assessment tool. Available online or as a database, LOCATION provides risk-specific information representing every address in the United States. The system gives you address-level information on the quality of fire protection services; the location of hydrants and other water sources; distances to coasts; the risk of wildfire, hurricanes, earthquakes, and severe thunderstorms; crime patterns; building code effectiveness; and much more. Such information can help you evaluate and mitigate risk throughout your supply chain.

LOCATION® Analyst

Geoanalytics for intelligent risk management

LOCATION® Analyst is Verisk's spatial risk management system. It uses insurance data, visual maps, and sophisticated reporting to help you make better risk management decisions throughout your supply chain. Using state-of-the-art geographic information system (GIS) technology, LOCATION Analyst lets you look at your business in a whole new light.

FloodAssist®

Accurately determining flood zones and flood risk

ISO's FloodAssist® is the online system that helps you accurately determine flood zones and flood risk. You just enter an address or legal description of a property, and FloodAssist automatically cross-references digital and hard-copy FEMA Flood Insurance Rate Maps (FIRMs), tax maps, and aerial and satellite photos to identify the specific location. Within seconds, the system determines whether the property is in a Special Flood Hazard Area (SFHA) and delivers a comprehensive flood report. That information can help you evaluate and mitigate supply chain risk.

ISO ClaimSearch®

ISO ClaimSearch®

Improving claims processing and preventing fraud

ISO ClaimSearch® is the property/casualty insurance industry's first and only comprehensive system for improving claims processing and fighting fraud. Frivolous or fraudulent insurance claims disrupt your supply chain and cost you time and money. ISO ClaimSearch can help. Each year, participating insurers and other organizations submit tens of millions of reports on individual insurance claims. ISO stores those reports in a single database that helps insurers, self-insurers, law enforcement agencies, and state fraud bureaus detect and prevent fraud, evaluate risk, and process meritorious claims.

ISO Risk Management Services

Services to help prepare for disasters and develop business continuity plans

Uncertainty created by exposure to catastrophes is an issue for even the most sophisticated supply chain. ISO can help you estimate the direct and indirect effects of business interruption losses and quantify the effect of catastrophes on the costs of materials, services, and labor. And ISO is a vital resource for catastrophe planning, resource allocation, event modeling, and business continuity and supply chain planning.

Property Claim Services® (PCS®)
Your primary source of information on catastrophes in the United States

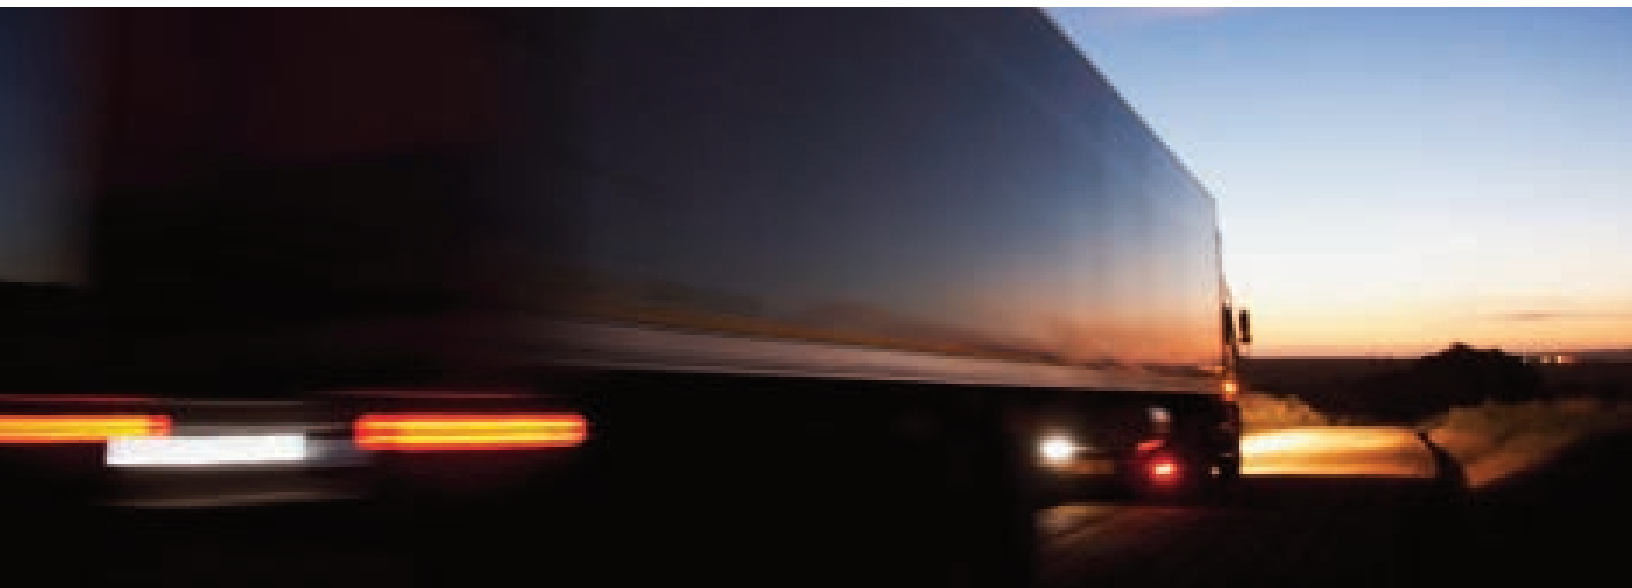

Property Claim Services® (PCS®) is the internationally recognized authority on insured property losses from catastrophes in the United States, Puerto Rico, and the U.S. Virgin Islands. As the effects of natural disasters ripple through the supply chain, stakeholders at every stage are looking for information that helps them quantify the losses. PCS investigates reported disasters and determines the extent and type of damage, dates of occurrence, and geographic areas affected.
