

MSDS On Demand[®]

MSDS On Demand offers round-the-clock access to MSDSs and provides a single resource for the management of hazardous materials information and compliance requirements.

3E ONCALL

Overview

3E MSDS On Demand provides 24-7-365 access to live professionals and the entire 3E database of millions of MSDSs (material safety data sheets), which are sent via email or fax directly to a customer, their employees or other related callers. In the event that a requested product is not available in the current 3E database, 3E acquires the MSDS directly from the manufacturer and forwards it to the customer as soon as possible. Translation assistance is also available for non-English speaking requestors. Round-the-clock hotline access to the 3E EH&S Mission Control

Center assists in compliance with global hazard communication requirements, offering a cost effective and efficient alternative to maintaining hard copy MSDS binders. Access to the hotline is available within five days of contract start date and puts hazardous materials information and compliance just one call away. An assigned 3E Customer Integration Specialist ensures a smooth implementation of the program. In addition, 3E provides start-up compliance kits, which include instructions, posters, phone stickers and other literature displaying the toll free telephone number for employee use.

Features

24-7-365 MSDS Access

Toll free, worldwide access to 3E's EH&S Mission Control Center and any MSDS in the extensive 3E database. 3E sends a requested MSDS to a fax located on a customer's site, to an ambulance, fire truck or healthcare facility as required.

MSDS Obtainment

3E's EH&S Data Center Specialists maintain the 3E database through a regular review of all MSDSs to ensure that the most current sheet is available to customers. And, based on 3E's extensive manufacturer relationships, MSDSs are often supplied directly to 3E's library when an update is issued or a new product is released.

24-7-365 Chemical Spill Assistance

Immediate toll free access to 3E's EH&S Mission Control Center to spill specialists for information and guidance on hazard assessment, location, weather considerations, evaluation of employee competency, use of personal protective equipment, absorbents, choice of storage containers, labeling and agency reporting requirements. 3E has expertise with all types of hazardous materials including toxins, bloodborne pathogens, asbestos, lead, infection and radioactive materials.

24-7-365 Poison & Exposure Assistance

Immediate toll free access via 3E's EH&S Mission Control Center to poison control specialists, physicians, and

toxicologists who provide medical advice related to chemical exposures, including skin/eye contact, inhalation and ingestion. Physicians are board certified in internal medicine, emergency medicine, occupation medicine, and medical toxicology. Veterinarians are board certified in internal medicine and veterinary toxicology.

Call Activity Documentation

3E tracks names, dates and all details related to the MSDS request. This documentation is available upon request.

Access to Historical Records

Expired MSDSs are archived at a secure storage facility in hardcopy or electronic format (DAT tape). Customers have access to archived MSDSs upon request.

Each of 3E's services comes with a variety of options and enhancement modules that can be configured based on a customer's EH&S information management needs. Contact us for more information today.

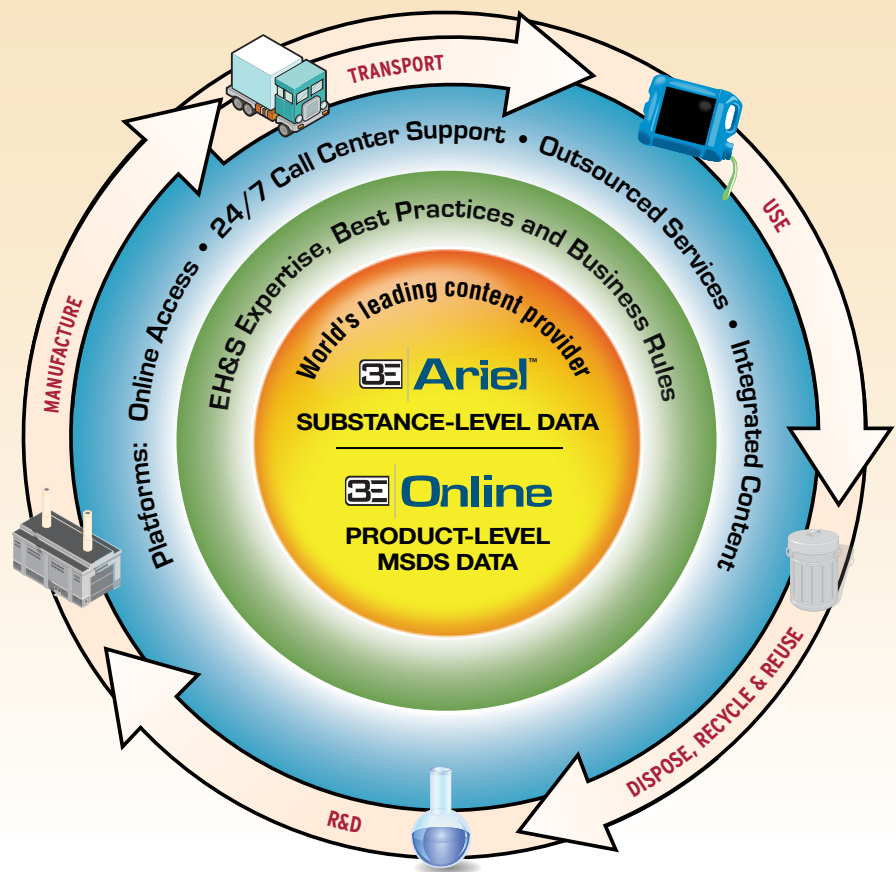

3E
COMPANY

**Trusted Global Provider of Chemical,
Regulatory & Compliance Information Services**

Full Chemical Lifecycle Management

3E Company's comprehensive suite of data products and information services enables improved compliance with global Environmental Health & Safety (EH&S) requirements related to the safe manufacturing, distribution, transportation, usage and disposal of chemicals and hazardous products. Whether you are a manufacturer, distributor, transporter, retailer or corporate user of chemicals or hazardous products, 3E can deliver a program specific to the EH&S compliance information and management needs of your organization that provides benefits to the entire enterprise and throughout the supply chain. 3E Company's full product lifecycle and supply chain approach provides a single, integrated solution for managing EH&S capabilities, resulting in reduced cost, risk and liability while improving business and compliance processes.

EH&S Challenges

With the spotlight shining brightly on EH&S compliance, companies are challenged with finding effective ways to address the complexities and intricacies of EH&S compliance management. Not only do these challenges stem from a constantly-changing regulatory landscape, but also from a scarcity of newcomers to the EH&S field, and pressure on EH&S departments to manage increased responsibility with fewer resources. Addressing these issues requires broad and deep domain expertise—expertise that doesn't always exist within the company. And if it does, this expertise is probably best utilized by driving the company's overall compliance strategy, not bogged down with paperwork or the administrative burdens associated with maintaining compliance.

EH&S Solutions

At 3E Company, we understand the business and the burden of EH&S information and compliance management. 3E Company is a comprehensive, one-stop solution for content, tools and services for companies that want to take effective leadership and control of their product stewardship and EH&S compliance activities. 3E's products and services help companies make the transition from simply managing for compliance, to cutting-edge product stewardship practices that deliver tangible and sustainable business results.
