

## Dangerous Goods Safety Adviser Services (DGSA)

*A cost effective solution to DGSA compliance*

### **Overview**

3E's DGSA services offer an outsourced solution to companies involved in the shipment of dangerous goods by air, road, rail or inland waterway in Europe. Through the assignment of a lead DGSA, 3E is able to develop a thorough understanding of the customer's business, helping to ensure delivery of services that are most effective for the customer's specific operations. This approach ensures that the independent consultative audit conducted by the 3E DGSA is consistent across sites, best practices are shared across sites, and deliverables reflect the company's culture and business practices.

3E DGSA's possess the necessary certifications, global EH&S expertise and communication skills required to assist clients in fulfilling the functions of a Dangerous Goods Safety Adviser, as required by the European Agreement Concerning the International Carriage of Dangerous Goods. Backed by a team of experienced, multi-lingual EH&S professionals, 3E provides a cost effective solution to DGSA compliance for manufacturers, distributors, suppliers and other companies involved in the shipment of dangerous goods throughout Europe.

DGSA services are part of a suite of Professional Services designed to assist companies with understanding and managing the impact of chemicals in the workplace, on their products, and in the regions where they conduct business.

### **Services can include:**

Advising the employer on health, safety and environmental matters in connection with the transport of dangerous goods.

Support for the annual compliance audit of each of the customer's facilities across Europe, which typically includes a review of the dangerous goods activities and compliance actions regarding work procedures, employee training, marketing information and general housekeeping.

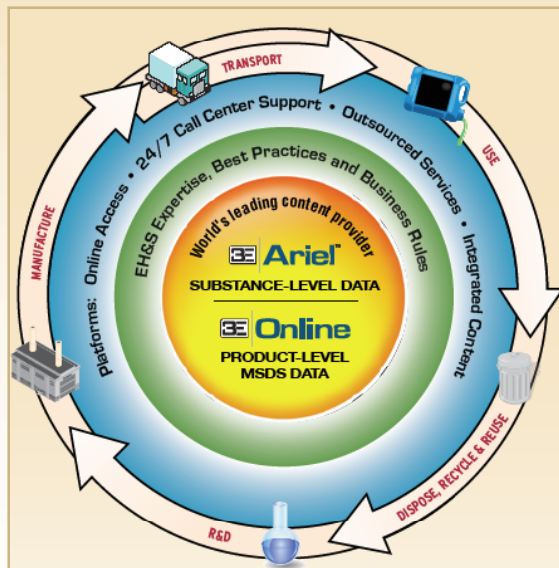

Verification that a management system is in place for the shipment of dangerous goods.

Preparation of the customer's dangerous goods annual report for management and public authorities.

### Full Chemical Lifecycle Management

3E Company's comprehensive suite of data products and information services enables improved compliance with global Environmental Health & Safety (EH&S) requirements related to the safe manufacturing, distribution, transportation, usage and disposal of chemicals and hazardous products. Whether you are a manufacturer, distributor, transporter, retailer or corporate user of chemicals or hazardous products, 3E can deliver a program specific to the EH&S compliance information and management needs of your organization that provides benefits to the entire enterprise and throughout the supply chain. 3E Company's full product lifecycle and supply chain approach provides a single, integrated solution for managing EH&S capabilities, resulting in reduced cost, risk and liability while improving business and compliance processes.

### EH&S Challenges

With the spotlight shining brightly on EH&S compliance, companies are challenged with finding effective ways to address the complexities and intricacies of EH&S compliance management. Not only do these challenges stem from a constantly-changing regulatory landscape, but also from a scarcity of newcomers to the EH&S field, and pressure on EH&S departments to manage increased responsibility with fewer resources. Addressing these issues requires broad and deep domain expertise—expertise that doesn't always exist within the company. And if it does, this expertise is probably best utilized driving the company's overall compliance strategy, not bogged down with paperwork or the administrative burdens associated with maintaining compliance.

### EH&S Solutions

At 3E Company, we understand the business and the burden of EH&S information and compliance management. 3E Company is a comprehensive, one-stop solution for content, tools and services for companies that want to take effective leadership and control of their product stewardship and EH&S compliance activities. 3E's products and services help companies make the transition from simply managing for compliance, to cutting-edge product stewardship practices that deliver tangible and sustainable business results.
