

European Product Registration Services

Alleviate the burden of product registration by relying on 3E's team of global regulatory compliance professionals

Overview

A number of European countries have national legislations requiring registration of certain products. This legislation is not harmonized at the EU level and is not being changed or impacted by REACH.

The provisions regarding product registration in each of the countries are very different when it comes to which products shall be registered and which information shall be submitted with the registration. In some countries, registered products are assigned a registration number.

If these national provisions on product registration are not complied with, the importer or producer may be subject to penalties such as a fine or the authorities may stop the import/production and sale of the product.

3E Company's operation in Copenhagen, Denmark is home to 3E's team of experienced regulatory experts, SDS (Safety Data Sheet) authors and compliance specialists, who have the necessary expertise to support our customers' specialized European needs.

Full Outsourcing:

For chemical products sold in a European country, 3E can:

- Determine if the product must be registered, and if so, in which countries
- Carry out the registration on behalf of the customer
- Maintain the registration
- Update SDSs and label documents

Compliance Assistance:

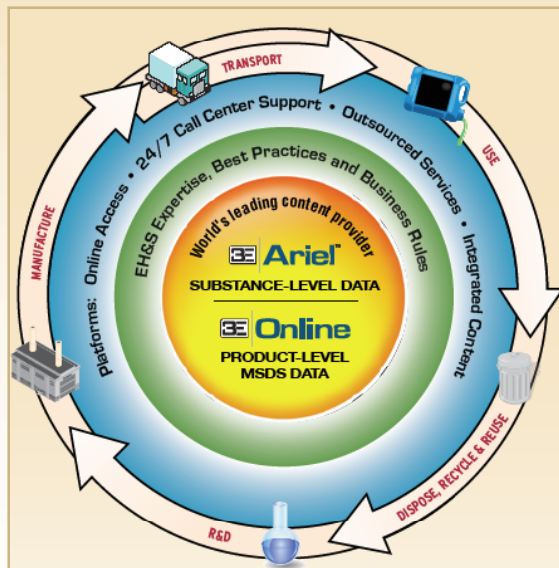

For companies who want to handle registrations in-house, but need a resource for understanding the requirements, 3E can:

- Provide basic training of the requirements for product registration, tailored to the company's specific types of products and business
- Assist with establishing and implementing company-specific procedures for on-going compliance

Full Chemical Lifecycle Management

3E Company's comprehensive suite of data products and information services enables improved compliance with global Environmental Health & Safety (EH&S) requirements related to the safe manufacturing, distribution, transportation, usage and disposal of chemicals and hazardous products. Whether you are a manufacturer, distributor, transporter, retailer or corporate user of chemicals or hazardous products, 3E can deliver a program specific to the EH&S compliance information and management needs of your organization that provides benefits to the entire enterprise and throughout the supply chain. 3E Company's full product lifecycle and supply chain approach provides a single, integrated solution for managing EH&S capabilities, resulting in reduced cost, risk and liability while improving business and compliance processes.

EH&S Challenges

With the spotlight shining brightly on EH&S compliance, companies are challenged with finding effective ways to address the complexities and intricacies of EH&S compliance management. Not only do these challenges stem from a constantly-changing regulatory landscape, but also from a scarcity of newcomers to the EH&S field, and pressure on EH&S departments to manage increased responsibility with fewer resources. Addressing these issues requires broad and deep domain expertise—expertise that doesn't always exist within the company. And if it does, this expertise is probably best utilized driving the company's overall compliance strategy, not bogged down with paperwork or the administrative burdens associated with maintaining compliance.

EH&S Solutions

At 3E Company, we understand the business and the burden of EH&S information and compliance management. 3E Company is a comprehensive, one-stop solution for content, tools and services for companies that want to take effective leadership and control of their product stewardship and EH&S compliance activities. 3E's products and services help companies make the transition from simply managing for compliance, to cutting-edge product stewardship practices that deliver tangible and sustainable business results.
